

LPB Energy Management Partners with e² Solutions to Deliver Best-in-Class Integrated Energy Management Services

DALLAS, TEXAS, June 10, 2009—LPB Energy Management announced today that it is expanding its energy management services footprint in Canada through a partnership with e² Solutions, Inc. (e²), an Ottawa, Ontario based on-demand facility maintenance and energy management solutions provider. To support e² in its bundled portfolio strategy that reduces the operating costs and environmental impact of its clients, LPB will provide a portfolio of back-end services, enabling e² to deliver best-in-class integrated energy management services to its client base.

LPB's Service Bureau in Olympia, Washington will be leveraged to manage utility invoice pre-payment processing and verification for e² clients' utilities, including electricity, natural gas, water, and wastewater. LPB's innovative Utility Manager™ software application will serve as the backbone for e²'s EnergySmart solutions and will be delivered to e² clients, offering them the ability to download utility invoice images for payment and analysis. e² clients will also have access to user-friendly reports and dashboards to track and benchmark utility cost and consumption.

Utility Manager's carbon emissions (CO₂) reporting capabilities will enhance the value of e²'s CarbonSmart solution which supports the growing movement towards a higher and more accountable level of social and corporate responsibility. Clients will be offered access to a variety of reports displaying information about emissions to help quantify, track and report CO₂ output and reductions over time. Together e² and LPB will provide reports on CO₂ to give clients a better understating of the positive impacts of energy management and lead to the adoption and expansion of energy efficiency and conservation programs.

"We are excited about the opportunity to partner with e²," said John Fardella, Executive Vice President of Business Development at LPB. "Working together to provide energy management solutions to Canadian clients will enhance our global initiatives for energy management and sustainability."

"LPB is the right partner for our clients," said Kevin Goodhue, Vice President of e² Solutions. "We carefully selected the partnership and look forward to maintaining our premier level of service offerings incorporating LPB's integrated energy management services which are highly esteemed within the industry. We anticipate joint success in helping clients manage their utility portfolio."

About LPB Energy Management:

LPB is a full-service energy management firm that helps clients measure, report and reduce energy costs and usage. Utility bill and meter data is centrally captured and then analyzed using

LPB's innovative Utility Manager™ software, revealing actionable insight that is at the core of LPB's integrated energy management solution. With offices across the U.S., LPB has helped over 1,000 corporate and government clients reduce energy costs and increase sustainability. LPB has been recognized with ENERGY STAR® Partner of the Year and Sustained Excellence awards, as well as a GSA schedule for Energy Management Program Support.
